**2016 Interim Meeting of International Neuromodulation Society (INS) &
Cadaver Workshop Program &
2016 Annual Meeting of Chinese Neuromodulation Society
(CNMS, 7th Congress)**

The Application of Neuromodulation

August 25-28, 2016

Chengdu, China

International Neuromodulation Society (INS)

Chinese Neuromodulation Society (CNMS)

Sanbo Brain Hospital / Capital Medical University

West China School of Medicine / West China Hospital of Sichuan University

Invitation

Dear Friends and Colleagues,

It is our great pleasure to hold the 2016 Interim Meeting of International Neuromodulation Society (INS) & Cadaver Workshop Program & 2016 Annual Meeting of Chinese Neuromodulation Society (CNMS, 7th Congress), scheduled from August 25th to 28th, 2016, in Chengdu, China. The Assembly will be the theme of the application of Neuromodulation technology, to build academic platform for in-depth study and the international exchange, closely linked to the developmental trend of the subject, orientation of academic research and clinical application, overall research to the frontiers in the disciplines of neuromodulation technology.

Neuromodulation is a novel discipline of modern medical technology. As the center of multiple disciplines, neuromodulation science transcends multiple disciplines such as neurology, cardiology, Gastroenterology, Otolaryngology, Urology and spinal surgery. Twenty-first Century will be the golden period for the development of neuroscience. In recent years, the United States and Europe initiated the brain research plan, where the neuromodulation technology is playing a crucial role. With the rapid development of neuromodulation technology in China and abroad, the number of practitioners is growing, which offers a promising hope for the majority of patients.

We are designing a program to offer our congress a rich and varied agenda, in order to help the participants to get the most in limited valuable time. You will have a comprehensive and in-depth understanding on the development and application of the neuromodulation discipline in China and the world. Here, we issue sincere invitation to the elite colleagues-welcome you to attend the conference! Let us share the academic feast, and promote the development of neuromodulation subject! We look forward to seeing you in Chengdu in August!

Timothy Deer
M.D. & Ph. D.
7th Congress, Co-Chairman
INS, President

Guoming Luan
M.D. & Ph. D.
7th Congress, Co-Chairman
CNMS, President

Chao You
M.D. & Ph. D.
