

The International Neuromodulation Society (INS) is a non-profit group of clinicians, scientists and engineers dedicated to the scientific development and awareness of neuromodulation - the alteration of nerve activity through the delivery of electrical stimulation or chemical agents to targeted sites of the body. Founded in 1989 and based in San Francisco, CA, the INS educates and promotes the field through meetings, its peer-reviewed, MEDLINE-indexed journal *Neuromodulation: Technology at the Neural Interface* and chapter websites.

Neuromodulation: Technology at the Neural Interface is the preeminent journal in the area of neuromodulation, providing our readership with the state of the art clinical, translational and basic science research in our field and representing the needs of the broad neuromodulation community. For clinicians, engineers, scientists and members of the biotechnology industry alike, neuromodulation provides timely and rigorously peer reviewed articles on the technology, science and clinical application of devices that interface with the nervous system to treat disease and improve function. Neuromodulation is published eight times a year and covers an ever-expanding field including pain, headache, movement disorders, spasticity, paralysis, psychiatric disorders, epilepsy, sensory deprivation, gastric dysfunction, obesity and incontinence.

The International Neuromodulation Society has Chapter Societies in:

- Argentina • Australia & New Zealand • Benelux Countries • Brazil • Canada • China • Germany • Italy • Japan • Korea • Nordic Countries
- North America • Poland • South East Europe • Spain • Switzerland • United Kingdom and Ireland

By joining any one of the chapters of the INS, receive membership not only in the chapter itself, but also receive membership benefits of the International Neuromodulation Society.

The advantages of membership include but are not limited to:

- Excellent, and increasingly large, international meetings every two years as well as chapter meetings
- The International Neuromodulation Society’s journal, *Neuromodulation*, eight issues per annum, plus online access to 17 years of back issues
- Informative newsletters; therapy and condition fact sheets; and member discussion forums.
- Registration discounts to INS conferences
- Interactive website: www.neuromodulation.com

Members of the International Neuromodulation Society receive the Journal, *NEUROMODULATION*.

Specialty (Please check all disciplines that apply):

- Anesthesiology Angiology Cardiology Neurology Neurosurgery Implanter Urology Gastroenterology Orthopedic Surgery Psychology Psychiatry Bio-Engineering Non-Implanter Nurse Other Specialty _____

I would like to Join Renew my membership

Please select a Chapter in your region to join both the Chapter and the INS. If there is no chapter in your region, join the INS.
