

2019 INS 14th World Congress Abstract Competition Results

Since 2015, the top five INS world congress research abstracts have been recognized for their quality, originality and ingenuity in basic or clinical science. In 2019, those abstracts and their presenters were:

Long-Term Results from The Avalon Study – Feedback-Controlled SCS Using Evoked Compound Action Potentials
Charles Brooker

A Comparison of Behavior and Report of Gene Expression Modulation of Waveform-Dependent Spinal Cord Stimulation in a Rat Model of Neuropathic Pain
David Cedeno

Modulation of the Neuroglia Interaction using Differential Target Multiplexed Spinal Cord Stimulation in an Animal Model of Neuropathic Pain
Ricardo Vallejo

Opioid Dose Reduction after Spinal Cord Stimulation
Nandan Lad

Personalized, Closed-Loop Deep Stimulation for Refractory Chronic Pain
Prasad Shirvalkar
